

1.) **Notes**

With all of our findings, datasets, and research into the subject at hand, the goal of our project is to give everyone the ability to find Covid-19 related information on the fly. For example, before we go out for a task, we tend to check either weather, google maps, or our texts for information before departing. We can add our Covid-19 Hotspot detection app to that list.

- Feature 1 would be to show and highlight the number of testing facilities in a given location.
- Feature 2 would be to have an interactive map in which people can enter any address and have it show them a live covid map of that area
- Feature 3 would be to have different colors on the map represent different stages or things about covid.
- Feature 4 would be to show the different options to get help and relief from.
- Feature 5 would be to connect family together via video chat.
- Feature 6 would be a reminder tab.

2.)

- Feature 1 would be to show and highlight the number of testing facilities in a given location.(Toby,Hemdeep)
- Feature 2 would be to have an interactive map in which people can enter any address and have it show them a live covid map of that area(Hemdeep,Dhruv)
- Feature 3 would be to have different colors on the map represent different stages or things about covid. (Toby, Dhruv)
- Feature 4 would be to show the different options to get help and relief from. (Toby)
- Feature 5 will help people isolated during the pandemic to continue receiving contact with their family and friends in a safe manner. This will promote a healthy alternative during this lockdown. (Dhruv)
- Feature 6 would be a reminder tab that is dedicated to all the safety measures that everyone can take to stop the spread of Covid 19.(Hemdeep)
